Downtown Boston is about a 30 minute ride from my residence. I listen, when I can to 680 WRKO, Boston which is a 50KW station. The problem is late afternoon and at night I can't hear it??? I can listen to New York and Canadian stations but not Boston? Even, during the day the station fades or goes static due to utility wires on the road. Please do something if you can with the patterns of AM stations. WBZ in Boston covers 36 states and I cannot listen to WRKO when I live about 35 miles from the transmitter site in Burlington, MA.. WRKO is the only station in the Boston area that carries Coast To Coast AM from 1AM to 5AM but it is impossible to listen. Thank You.
