I'm glad that formerly on this public site for the FCC , we are assured of the importance of our Rights in reference to the free flowing communication of ideas and information . We must all watch the FCC very carefully for any deviation from the acknowledgements expressed above . It only takes one future action from the FCC to condemn us all into an Orwellian existence .

Additional , a progression of small innocent intrusions could have similar effects . The above FCC Article mentions a comprehensive review of our broadcast ownership rules in the Spring citing : "There's not a single minority-owned TV Station in the country , clearly we must do better ." . In the year 2014 , I find it difficult to believe that the FCC has any rules that prevent any "group" of people from owning a TV Station . It is healthy for the FCC to formally review its rules periodically . It is unhealthy for the FCC to review it's rules solely in an attempt to allow minority groups an easier opportunity to own a TV Station than any other Citizen in America . Most Americans (regardless of which group the racist factions of the Federal Government wish to place us within) understand that the lack of available funding (private or public) generally prevent anyone from owning & operating a TV Station .

I will be watching the FCC's progression of it's review of the rules of ownership very carefully and looking for the results of any changes . "All men are created equal..." is a creed that Americans all know and the Federal Government continues to unravel . Unless the FCC plans on making it easier for ALL Americans to own a TV Station , then the FCC must be called out and prosecuted for biased practices . You simply can no longer hide the fact that the Billionaires own almost all of the TV Stations and the FCC's rules have fostered this exclusi onary ownership . The Truth is coming to Americans this Spring and thereafter .
